

HOW WE'RE PROTECTING OUR FAMILIES

SCREENING

We're screening caregivers and students every day for fever, cough and shortness of breath.

STAYING AT HOME

We're ensuring sick caregivers and students stay home to keep everyone who enters our programs safe.

SANITIZING

We're cleaning and sanitizing surfaces frequently.

HANDWASHING

We're ensuring all students and caregivers are frequently washing their hands to stop the spread of germs.

HOW YOU CAN HELP

- Check your child's temperature every day.
- Keep children home if they have a fever of 100.4°F (38°C) or above.
- Ensure caregivers and students are the only people in our programs.
- Ideally, the same parent or designated person should drop off and pick up the child every day.
